I am a graduating Information Technology student specializing in Web and Mobile Application Development with hands-on experience in building web applications and database-driven systems. Through academic, client-based, and personal projects, I have developed practical skills in technologies such as Angular, PHP, MySQL, and Tailwind CSS. I am passionate about creating scalable and user-centered solutions and am eager to contribute my technical expertise while growing as a software developer.

EDUCATION

LAGUNA STATE POLYTECHNIC UNIVERSITY - SINILOAN CAMPUS

BS in Information Technology | Major in Web and Mobile Application Development

WORK EXPERIENCE

Freelance System Developer

2023 - Present

- Developed custom websites using HTML, CSS, and JavaScript improving system performance and user experience across multiple client projects.
- Built a responsive and mobile-friendly user interface, enhancing accessibility and usability across desktop, tablet, and mobile devices.
- Optimize database queries and application logic, reducing page load times and improving overall system efficiency.

Customer Support Virtual Assistant | WFH+Part-Time

2025 - 2026

- Migrate Handled customer inquiries through email, chat and ticketing systems, maintaining high customer satisfaction.
- Prepared reports and monitored customer feedback to help improve service quality and customer satisfaction.
- Maintained accurate customer records and documented support interactions, ensuring efficient case tracking and follow-up.

PROJECTS

Student Clearance and Monitoring System

2025

- Developed a web-based system that automated student clearance that automated student clearance processing and tracked academic requirements in real time.
- Built using HTML, CSS, JavaScript, PHP, and MySQL to improve administrative efficiency and record management.

Thesis Management System

2025

- Developed a centralized platform for managing thesis submissions, adviser assignments, and project progress tracking.
- Implemented role-based access and document management features, improving collaboration between students and faculty members.

Recipehub

2026

- Developed responsive front-end and back-end functionalities using React.js (v19), Tailwind CSS, Node.js, and MySQL, improving application performance and delivering a seamless user experience across devices.
- Created a recipe-sharing web application that allowed users to browse, search, and manage recipes through an intuitive interface.

TECHNICAL SKILLS

LANGUAGES: PHP, Python, JavaScript/Typescript, HTML, CSS, SQL

FRAMEWORKS: Angular, React, Tailwind CSS, Bootstrap

DATABASE: MySQL, PostgreSQL

TOOLS: Git, GitHub, XAMPP, VS Code

CERTIFICATIONS

IT Specialist - HTML & CSS Certification (Certiport) - Demonstrated proficiency in HTML, CSS, responsive web design, and front-end development fundamentals.

Certified in Cybersecurity (CC) (ISC2) - Validated knowledge of cybersecurity principles, network security, risk management, and security operations.

Google AI Professional Certificate (Google) - Developed practical skills in artificial intelligence, generative AI, prompt engineering, and AI-powered productivity tools.
